## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Applicant mentions first super-message digest is derived from timestamp associated with first super-message digest. However, how can one derive first super-message digest from itself. The Examiner believes the applicant meant "second super-message digest is derived from timestamp..." Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims <sup>1 and 5</sup> ~~15~~ are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,946,396 to Davis in view of U.S. Patent 5,136,646 to Haber et al(hereinafter Haber).

5. Regarding Claim 1, Davis discloses the creating of message digests(see Fig.2 item 310, 315) and forming a first super message digest(see Fig. 1 item 170<sub>1</sub>,170<sub>2</sub>), further the second message digest forming from the first super message digest(see Fig. 1 item 180<sub>1</sub>,180<sub>2</sub>), transmitting it to a timestamp authority(see Abstract & Col 3 Ln 18-32). But does not disclose the audit log and receiving a plurality of documents for creating message digest. However, Haber discloses the plurality of documents being received see Fig. 1 item 11 and creating a receipt see Fig.1 item 14. It would be obvious to one having ordinary skill in the art at the time of the invention to modify video and audio clips to documents and creating a audit log in the invention of Davis in order to have a document that is secure as taught in Haber see Col 2 Ln 50-68.
6. Regarding Claim 5, Davis does not discloses the timestamp being stored in audit log. However, Haber discloses the timestamp being stored in audit log see Col 4 Ln 22-40. It would be obvious to one having ordinary skill in the art at the time of the invention to include a timestamp being stored in audit log in the invention of Davis in order to have a new and update log as taught in Haber see Col 4 Ln 43-49.

***Allowable Subject Matter***

7. Claim 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
